

Westcode Part Number Cross-reference List

Several years ago WESTCODE SEMICONDUCTORS Ltd. Changed the numbering system (nomenclature) used to describe their power semiconductor devices.

For a complete guide to the nomenclature currently in use, please refer to the IXYS/Westcode short-form catalogue or the explanatory document 'Westcode nomenclature guide' on the H-Rep website (<http://www.h-rep.net/page6.html>)

This cross-reference list is to help the user identify 'new' numbers from 'old' and vice versa.

Devices for which there are no direct equivalents have been omitted.

IF THE DEVICE YOU ARE TRYING TO IDENTIFY IS NOT IN THE LIST, PLEASE CONTACT H-REP. It may well be that an electrically superior but mechanically identical device is readily available.

Special care should be taken with the high speed thyristors ('D', 'P' and 'R' devices) since the suffixes denoting dv/dt and Tq have been omitted from the 'old' numbers. **PLEASE CONTACT H-REP FOR CLARIFICATION.**
